Individualisation function

PROFESSIONAL

A look that speaks for itself

Stylishly elegant and created using materials of the finest quality, with its Cool Nordic Design this top of the range unit not only shines through its look but also knows how to satisfy even the most sophisticated coffee request from customers, guests and employees with total simplicity. In addition to classic coffees such as ristretto, espresso or café crème, the IMPRESSA X9 Win also has fashionable drinks such as cappuccino or latte macchiato at its control at the press of a button. In addition to its unique design and wide range of product choices the TFT screen also provides adScreen advertising, in other words advertising in image and sound form. Whether this is at the Point of Sale (POS), where eight out of ten buying decisions are made, or for use in seminars where participants can be provided with information on additional offerings. Give your customers the decisive impetus and encourage your target group to make additional, spontaneous purchases. The IMPRESSA X9 Win will pay for itself wherever it is used!

Simple operation thanks to 'Smart Lead'

'Smart Lead', the graphic and sound-aided, interactive user manual from JURA, guides the individual through each single step in the operation and care of the unit. Simplifying the task of maintenance: from filling the water tank right through to cleaning – 'Smart Lead' displays every individual step in the form of images and sounds. The operator is guided through the whole procedure, simplifying the process and minimising errors, avoiding unnecessary service costs or lost sales as a result of the machine being out of use. Ensuring that the IMPRESSA X9 Win is operated and maintained correctly at all times!

Speciality coffees

The IMPRESSA X9 Win has more than 20 speciality coffees at its control, each of which can be adapted to suit individual tastes. The 3.5 inch TFT screen quickly leads the user to his/her chosen speciality coffee in no time at all and creates coffee enjoyment at the press of a button. Whether ristretto, espresso, café crème, coffee with milk, coffee in a glass, cappuccino or trendy latte macchiato: let your taste buds decide! The preparation of up to 100 cups a day poses no problems.

Programming

When the programming flap slides elegantly upwards it reveals the programming field with a wide range of setting options. This is where the cleaning, maintenance and decalcification programmes can also be started or the integrated cup counter called up. Like to limit the programming to a specific user group? No problem: simply create code groups.

IMPRESSA X9 Win
